INSPECTIONS AND/OR INVESTIGATION UNDERTAKEN

Website of Ministry of Corporate Affairs (MCA) visited to carry out the inspections of various returns and information furnished by the company with MCA.

VALUATION METHODOLOGY, APPROACH AND PROCEDURES ADOPTED

The standard of value used in the analysis is “Fair Market Value”, which is often defined as the price, in terms of cash or equivalent, that a buyer could reasonably be expected to pay, and a seller could reasonably be expected to accept, if the business were exposed for sale on the open market for a reasonable period of time, with both buyer and seller being in possession of the pertinent facts and neither being under any compulsion to act.

Valuation of a business is not an exact science and ultimately depends upon what it is worth to a serious investor or buyer who may be prepared to pay substantial goodwill. This exercise may be carried out using various methodologies, the relative emphasis of each often varying with:

- whether the entity is listed on a stock exchange;
- industry to which the Company belongs;
- past track record of the business and the ease with which the growth rate in cash flows to perpetuity can be estimated;
- Extent to which industry and comparable company information are available.

PRICING OF FREQUENTLY TRADED SHARES

Regulation 164 (1) of SEBI (ICDR), 2018 as amended from time-to-time states that

For frequently traded shares, If the equity shares of the issuer have been listed on a recognized stock exchange for a period of 90 trading days or more as on the relevant date, the price of the equity shares to be allotted pursuant to the preferential issue shall be not less than higher of the following:

- (a) The 90 trading days volume weighted average price of the related equity shares quoted on the recognized stock exchange preceding the relevant date; or
- (b) The 10 trading days volume weighted average prices of the related equity shares quoted on a recognized stock exchange preceding the relevant date.

Provided that if the Articles of Association of the issuer provide for a method of determination which results in a floor price higher than that determined under these regulations, then the same shall be considered as the floor price for equity shares to be allotted pursuant to the preferential issue by an independent valuer, which shall be submitted to the stock exchanges where the equity shares of the issuer are listed.

Regulation 166A (1) of SEBI (ICDR), 2018

Any preferential issue, which may result in a change in control or allotment of more than five percent. of the post issue fully diluted share capital of the issuer, to an allottee or to allottees acting in concert, shall require a valuation report from an independent registered valuer and consider the same for determining the price:

Provided that the floor price, in such cases, shall be higher of the floor price determined under sub-regulation (1), (2) or (4) of regulation 164, as the case may be, or the price determined under the valuation report from the independent registered valuer or the price determined in

accordance with the provisions of the Articles of Association of the issuer, if applicable:

Provided further that if any proposed preferential issue is likely to result in a change in control of the issuer, the valuation report from the registered valuer shall also cover guidance on control premium, which shall be computed over and above the price determined in terms of the first provision:

Provided further that the valuation report from the registered valuer shall be published on the website of the issuer and a reference of the same shall be made in the notice calling the general meeting of shareholders

As per Regulation 164 (5) “**frequently traded shares**” means the shares of the issuer, in which the traded turnover on any recognized stock exchange during the [240 trading days] preceding the relevant date, is at least ten per cent of the total number of shares of such class of shares of the issuer.

The Traded turnover of **Atmastco Ltd** on NSE Limited is More than 10% so the company will come under the category of frequently traded shares.

BASIS/ BASES OF VALUE USED

This valuation report relies upon the use of fair market value as the standard of value. For the purposes of this valuation, fair market value is defined as the expected price at which the subject business would change hands between a willing buyer and a willing seller, neither being under a compulsion to conclude the transaction and both having full knowledge of all the relevant facts. This is essentially identical to the market value basis as it is defined under the International Valuation Standards. The valuation was performed under the premise of value in continued use as a going concern business enterprise. In my opinion this premise of value represents the highest and best use of the subject business assets.
